DETAILED ACTION

Election/Restrictions

It is noted that applicant elected without traverse Group II, claims 15-17. Claims 9-14 and 18-20 are withdrawn from further consideration by the examiner as being drawn to non-elected subject matter.

The restriction is still considered to be proper and is therefore made FINAL.

Due to applicants amending the claims the application has to be restricted as follows:

The invention is drawn to many different components which are contained in many different compositions. Dependent claims are drawn to specific components. The components vary distinctly in their structures and functions. Thus, an individual search is required of each individual component. Therefore, in addition to electing one of the groups as the elected invention (which applicant has elected group II), Applicant is required to elect a specific composition containing the specific elected components (i.e. acetic acid, PEG 4000, dextran 70, etc.), to which the elected invention will be examined on the merits as drawn to; as well as identifying those claims to which the elected composition is drawn. This requirement is not to be taken as an election of

species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.
